

### **DETAILED ACTION**

- This action is responsive to the following communication: appeal brief filed 4/4/2009.

#### ***Response to Arguments***

Applicant's arguments, see pages 7-12, filed 4/4/2009, with respect to claims 1, 10, 16, 20, and 21 have been fully considered and are persuasive. The prior art rejection of claims 1, 10, 16, 20-21 has been withdrawn.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Trenner on 7/20/09.

Please amend the following claims:

10. (Currently Amended) A system for remotely monitoring printer status, comprising:  
a processor circuit having a processor and a memory;  
a remote printer management system stored in the memory and  
executable by the processor, the printer monitoring system comprising:  
logic that displays a list of selectable printer status objects on a display  
device by displaying a name of each of the printer status objects in ~~the~~ a printer  
management language native to a printer;  
logic that facilitates a selection of one of the printer status objects from  
among the list of selectable printer status objects;  
logic that generates an email to be transmitted to a printer;  
logic that writes a request for a status of the selected one of the printer  
status objects in the printer into the email, the request being expressed in ~~a~~ the printer

Art Unit: 2625

management language native to the printer; and logic that transmits the email to the printer to receive a reply email from the printer that includes the current status of the selected one of the printer status objects in the printer.

16. (Currently Amended). A program stored in a computer-readable medium for remotely monitoring printer status, comprising:

code that displays a list of selectable printer status objects on a display device by displaying a name of each of the printer status objects in ~~the~~ a printer management language native to a printer;

code that facilitates a selection of one of the printer status objects from among the list of selectable printer status objects specified in a management information base (MIB) applicable to a printer;

code that generates an email to be transmitted to the printer;

code that writes a request for a status of the selected one of the printer status objects in the printer into the email, the request being expressed in ~~a~~ the printer management language native to the printer; and

code that transmits the email to the printer to receive a reply email from the printer that includes the current status of the selected one of the printer status objects in the printer.

20. (Currently Amended). A system for remotely monitoring printer status, comprising:

means for displaying a list of selectable printer status objects on a display device by displaying a name of each of the printer status objects in ~~the~~ a printer management language native to a printer;

means for facilitating a selection of one of the printer status objects from the list of selectable printer status objects specified in a management information base (MIB) applicable to a printer;

means for generating an email to be transmitted to the printer;

means for writing a request for a status of the selected one of the printer

Art Unit: 2625

status objects in the printer into the email, the request being expressed in ~~a~~ the printer management language native to the printer; and  
means for transmitting the email to the printer to receive a reply email from the printer that includes the current status of the selected one of the printer status objects in the printer.

21. (Currently Amended) A method for remotely configuring a printer, comprising the steps of:

displaying a list of selectable printer status objects on a display device by displaying a name of each of the printer status objects in ~~the~~ a printer management language native to a printer;

selecting a printer status object from among the list of selectable printer status objects in a remote client in data communication with a printer; generating an email in the remote client;

writing a command to manipulate a configuration of the printer into the email in ~~a~~ the printer management language native to the printer;

transmitting the email to the printer;

and receiving a reply email from the printer that acknowledges a modification of the configuration of the printer in response to the command.

#### ***Allowable Subject Matter***

- Claims 1-5, 10-13, 16-19, and 20-21 allowed; renumbered as claims 1-15.
- The following is an examiner's statement of reasons for allowance:

The prior art of record (US 6931447 to Hemstreet et al) teaches a method for remotely monitoring a printer status including displaying a list of selectable printer status objects on a display device in a remote client in a data communication with a printer, where a name of each of the printer status objects is displayed in a user-friendly format. The closest prior art of record mentioned and described above does not disclose, teach or

Art Unit: 2625

suggest, the claimed limitation of “where a name of each of the printer status objects is displayed in a printer management language native to the printer” as recited in independent claim 1.

Claims 10, 16 and 20-21 recite the same or similar claim limitations and/or features as recited in independent claim 1 and therefore are found to be allowable for the same or similar reasons as stated and mentioned above in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
